

## JMIR PUBLICATION TASK

Task is done by using bootstrap in front end and PHP & MYSQL in backend. PHP coding is done in mvc & oop structure with best reusability of classes to reduce the time consumption for developing application.

Jquery is working fine in IE, Chrome, Safari browser ( tested ) and this UI supports well sto internet explorer and chrome browser. Failed to do task properly for complete responsiveness but still task is responsive and can do it better for compatibility by your and your team assistance. I also want to explore my knowledge by learning laravel & angularjs quickly to give my best to your company.
